

Earlham Primary Summer Learning Projects

Year 1

Below are some projects for you to do over the summer holidays. These are all linked to things that we have learnt together this year in the classroom and in our google classroom.

Maths	English	Science	Computing
Design a board game to help other children learn their addition and subtraction facts to 20. This should be a game you can play with 2 or more people. Test it out on people in your household and make changes to your design if needed.	Read every day for 10 minutes and keep a diary of all the things you do. You can share it with the class when you come back. Remember to write the date at the top of each page, use the past tense, capital letters, full stops and finger gaps!	Go on a nature walk outside. Take photos or drawings of some of the interesting things that you find. See if you can find any of the plants or animals that we learnt about this year.	Use the online coding program Scratch to design a game. There are also tutorials on Youtube that might help you. https://scratch.mit.edu/
Wellbeing	History OR Geography	Art or DT	PE
Create a well-being toolbox. Put inside anything that reminds you of good times or helps you feel better. For example; photos, drawings, a gift from someone, a sachet of hot chocolate, a list of activities you can do to relax: cuddle a teddy, watch your favourite DVD, take 10 deep breaths etc. If you don't have a box you can find a special place in your room to put the items or simply list/draw them.	Create a fact file about a city or place in the UK as next year you will learn more about the country. You can use Google maps to explore the UK and choose a place. Research it using books and the internet. Then create a fact file with any key facts and pictures.	Create a story box of one of your favourite stories this year. All you need is an old box. Decorate it like a scene from the book and create objects or characters to go inside! For example if you choose 'Man on the Moon' you could create a space scene with Bob and the aliens!	Keep a daily fitness diary of the exercise you do including what the exercise was and how long you did it for. Some things you could do: dancing, running, skipping, cycling, work-outs. Try to exercise for at least 1 hour every day and use the links on our Google classroom to help you!

Stay safe, stay healthy and we will be back in September.
