

# Earlham Primary Summer Learning Projects

## Year 3

Below are some projects for you to do over the summer holidays. These are all linked to things that we have learnt together this year in the classroom and in our google classroom.

Maths	English	Science	Computing
Design a board game to help other children to learning the 4 and 8 times tables. Remember to include the division facts too. This should be a game you can play with 2 or more people. Test it out on people in your household and make changes to your design if needed.	Make your own chapter book. Write a story about a child living in the Ancient Egyptian times. Remember what we have learnt this year about the way Ancient Egyptians lived. What could the problem be and how is it solved? Remember to have a clear beginning, middle and end. Add illustrations to your book.	Think about what we learnt about in plants this year. Maybe you could draw and label fruit and vegetables that you buy. If you are in the park or in a garden, you could see if you can recognise any plants or trees. You might want to sketch these too.	You have been asked to design the new IPHONE by Apple. Create a user manual for the new phone which explains all the key functions and APPS. Your manual should include sub-headings, instructions, diagrams and captions.
Wellbeing	History OR Geography	Art or DT	PE
Choose a day and time and do a video diary at this time every week. In your diary entry you should include things you have done that week and how they made you feel. Think of some things that you would like to do for the following week. See if you can try something new every week!	Create a map for a new town. The town must have enough homes for at least 20 families, a school, a police station, a supermarket, a restaurant, a post office, a bank, a park, a hospital and any other shops you would like to include.	Look at some of the Art on landscapes by David Hockney. Try to draw different landscapes from the different seasons.	Keep a daily fitness diary of the exercise you do including what the exercise was and how long you did it for. Some things you could do: dancing, running, skipping, cycling, work-outs.

Stay safe, stay healthy and we will be back in September.
