

Earlham Primary Summer Learning Projects Year 5 to Year 6

Below are some projects for you to do over the summer holidays. These are all linked to things that we have learnt together this year in the classroom and in our google classroom.

Maths	English	Science	Computing
<p>Design a board game to help other children with their learning about square numbers, prime numbers and times tables facts up to 12x12. Remember to include the division facts too. This should be a game you can play with 2 or more people. Test it out on people in your household and make changes to your design if needed. If you wanted to really push yourself, try making a fractions based board game with fraction calculations!</p>	<p>Make your own chapter book. Write a story about a child living in Anglo Saxon times. Remember what we have learnt this year about the way Anglo Saxons lived. What could the problem be and how is it solved? Remember to have a clear beginning, middle and end. Add illustrations to your book.</p>	<p>This year, we learnt that a fair test is when we only change one variable in an experiment and keep everything else the same. Design a fair test to see how air resistance effects the speed in which objects fall to the ground. Will a big piece of paper or small piece of paper hit the ground first?</p>	<p>You have been asked to design the new IWatch by Apple. Create a user manual for the new watch which explains all the key functions and APPS. Your manual should include sub-headings, instructions, diagrams and captions.</p>
Wellbeing	History OR Geography	Art or DT	PE
<p>Choose a day and time and do a video or written diary at this time every week. In your diary entry you should include things you have done that week and how they made you feel. Think of some things that you would like to do for the following week. See if you can try something new every week!</p>	<p>Create a map for a new town. The town must have enough homes for at least 20 families, a school, a police station, a supermarket, a restaurant, a post office, a bank, a park, a hospital and any other shops you would like to include.</p>	<p>Have a look at some of the art produced by the pop artist Roy Lichtenstein. Use his techniques to create your own picture of a coast line, a river and an urban scene.</p>	<p>Keep a daily fitness diary of the exercise you do including what the exercise was and how long you did it for. Some things you could do: dancing, running, skipping, cycling, work-outs.</p>

Stay safe, stay healthy and we will be back in September.
