

# Earlham Primary Summer Learning Projects

## Year 6

Below are some projects for you to do over the summer holidays. These are all linked to things that we have learnt together this year in the classroom and in our google classroom.

Maths	English	Science	Computing
<p>In ICT you have been learning about the things that make a computer game good. Design a Maths game that could teach younger children about fractions. This could include finding fractions of shapes or amounts; comparing and ordering fractions; or adding and subtracting fractions.</p>	<p>Choose one of your favourite stories. Then take a shoe box (or cereal box) and plan and construct the story's setting inside the box (buildings, roads, trees...). Once you have built your setting, write a description of it using a range of descriptive vocabulary. Try to make the reader feel as though they are there, inside the story's setting</p>	<p>This year we have completed work on evolution and adaptation. Look at Darwin's theory again and choose a point where you think that humans could have evolved differently. What would have caused this change? What type of environment was the human adapting to live in? Draw what humans could have adapted to look like and describe the changes.</p>	<p>You have been asked to design the new IPHONE by Apple. Create a user manual for the new phone which explains all the key functions and APPS. Your manual should include sub-headings, instructions, diagrams and captions.</p>
Wellbeing	History	Art	PE
<p>Choose a day and time and do a video diary at this time every week. In your diary entry you should include things you have done that week and how they made you feel. Think of some things that you would like to do for the following week. See if you can try something new every week! While reflecting on your feelings, see if you can identify something that helps you to feel calm and peaceful; if you ever find yourself experiencing negative emotions you can focus on these things instead.</p>	<p>Make a time capsule. This is a great way to preserve memories. A time capsule generally centres around a specific event or moment in time. Sometimes these events are simply a birthday or a new year, while others focus on life-changing or history-making events such as the current COVID-19 pandemic. More information and instructions are on Google Classroom.</p>	<p>You have learned about the pop art of Andy Warhol. These are two of his famous pieces:</p> <div style="display: flex; align-items: center;">  <p>Use these ideas to produce your own piece of art work. It could be centred around your favourite things to eat or it could be about a person who is dear to you, a pet or a self-portrait.</p> </div>	<p>Challenge yourself to do something physically active each day for 30-60 minutes. Invent a team game that could help you with this – it could contain the features and rules of some of your favourite games and sports and additional ideas from you.</p>

Stay safe, stay healthy.
